A highly deformable and advanced 3D interlocking flexible battery is developed via a simple, one-step patterning process. The authors emphasize that the mechanical disintegration of the electrode such as through delamination, particle isolation, and crack generation were significantly mitigated, which enhances the structural and chemical stability.

Strength training is a type of physical exercise specializing in the use of resistance to induce muscular contraction which builds the strength, anaerobic endurance, and size of skeletal muscles.. When properly performed, strength training can provide significant functional benefits and improvement in overall health and well-being, including increased bone, muscle, tendon, and ligament ...
