A broken bone happens when one of your bones becomes cracked or broken into multiple pieces. It's also known as a fracture. It can result from a sports injury, accident, or violent trauma.

First Aid for Broken Bones and Fractures - Healthline

A fracture is a break, usually in a bone. If the broken bone punctures the skin, it is called an open or compound fracture. Fractures commonly happen because of car accidents, falls, or sports injuries. Other causes are low bone density and osteoporosis, which cause weakening of the bones. Overuse can cause stress fractures, which are very small cracks in the bone.

Fracture | MedlinePlus

A bone fracture (sometimes abbreviated FRX or Fx, F x, or #) is a medical condition in which there is a partial or complete break in the continuity of the bone. In more severe cases, the bone may be broken into several pieces. A bone fracture may be the result of high force impact or stress, or a minimal trauma injury as a result of certain medical conditions that weaken the bones, such as ...
