Java SE Specifications - Oracle

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutations, genetic recombination and other sources of genetic variation.

The survey asked Muslims about their views on various dimensions of contemporary life. Muslims see few tensions between their faith and life in the modern world.

Chapter 7: Religion, Science and Popular Culture

Human evolution is the evolutionary process that led to the emergence of anatomically modern humans, beginning with the evolutionary history of primates â€” in particular genus Homo â€” and leading to the emergence of Homo sapiens as a distinct species of the hominid family, the great apes. This process involved the gradual development of traits such as human bipedalism and language, as well as ...
