People with hearing loss can dream of a future when hearing aids might also serve as wireless loudspeakers, delivering clear, customized sound from inside their ears.

Hearing Loop

Appraisal theory is the theory in psychology that emotions are extracted from our evaluations (appraisals or estimates) of events that cause specific reactions in different people. Essentially, our appraisal of a situation causes an emotional, or affective, response that is going to be based on that appraisal. An example of this is going on a first date.

Appraisal theory - Wikipedia

Emotional labor is the process of managing feelings and expressions to fulfill the emotional requirements of a job. More specifically, workers are expected to regulate their emotions during interactions with customers, co-workers and superiors.

Children who have suffered early abuse or neglect may later present with significant behavior problems including emotional instability, depression, and a tendency to be aggressive or violent with others. Troublesome behaviors may persist long after the abusive or neglectful environment has changed or the child has been in foster care placement.

Understanding the Behavioral and Emotional Consequences of

What is self-injury? Nonsuicidal self-injury (NSSI) is the deliberate, self-inflicted destruction of body tissue resulting in immediate damage, without suicidal intent and for purposes not culturally sanctioned. Self-injury can include a variety of behaviors but is most commonly associated with: intentional carving or cutting of the skin

About Self-Injury and Recovery

The Health Action Process Approach (HAPA) suggests that the adoption, initiation, and maintenance of health generic behaviours must be explicitly conceived as a process that consists of at least a motivation phase and a volition phase. The latter might be further subdivided into a planning phase, action phase, and maintenance phase.

Health Action Process Approach
