CICAMH – Critical Issues in Child and Adolescent MHC

In developmental psychology and developmental biology, a critical period is a maturational stage in the lifespan of an organism during which the nervous system is especially sensitive to certain environmental stimuli. If, for some reason, the organism does not receive the appropriate stimulus during this "critical period" to learn a given skill or trait, it may be difficult, ultimately less ...

Social issues in China are varied and wide-ranging, and are a combined result of the Chinese economic reforms set in place in the late 1970s, China's political and cultural history, and an immense population. Because of the vast number of social problems that exist in China today (not at all exclusive to the following list), China's government has faced considerable difficulty in trying to ...
