In information security, a guard is a device or system for allowing computers on otherwise separate networks to communicate, subject to configured constraints. In many respects a guard is like a firewall and guards may have similar functionality to a gateway.. Whereas a firewall is designed to limit traffic to certain services, a guard aims to control the information exchange that the network ...

## **Broadcom Inc. | Connecting Everything**

Heathrow Connect was a train service in London provided jointly by Heathrow Express and Great Western Railway (GWR), between Heathrow Airport and Paddington station. The service followed the same route as the non-stop Heathrow Express service but called at certain intermediate stations, connecting several locations in West London with each other, the airport, and Central London.
