

digital darkroom pdf

A darkroom is a workshop used by photographers working with photographic film to make prints and carry out other associated tasks. It is a room that can be made completely dark to allow the processing of the light-sensitive photographic materials, including film and photographic paper. Various equipment is used in the darkroom, including an enlarger, baths containing chemicals, and running water.

Darkroom - Wikipedia

Digital sensors (both CCD and CMOS) are linear. That means the voltage generated in each pixel, and hence the pixel level emerging from the A-to-D converter (the device that converts the sensor output to discrete bits), is proportional to exposure-- to the light energy reaching the pixel.

Tonal quality and dynamic range in digital cameras

Darkroom Software solutions have been created by photographers for photographers and are incredibly suited to be scaled to any size photography enterprise.

Protecting your gear If you only intend to shoot in show caves, gear protection involves little more than it does on the surface, such as a padded camera case.

Cave Photography: Getting Great Pictures in Natureâ€™s Darkroom

A safelight is a light source suitable for use in a photographic darkroom. It provides illumination only from parts of the visible spectrum to which the photographic material in use is nearly, or completely, insensitive.. Design. A safelight usually consists of an ordinary light bulb in a housing closed off by a coloured filter, but sometimes a special light bulb or fluorescent tube with ...
