The qualitative approach to research design leads to studies that are quite different from those designed using the more traditional approach. The traditional approach, often referred to as quantitative research, leads to hypothesis-testing research, whereas the qualitative approach leads to hypothesis-generating research. This chapter will describe the difference

the integrity of consumer scholarship. The rigour of the consumer studies discipline depends on scholars being able to address deep questions about the integrity of their work.

McGregor, S.L.T., & Murnane, J. A. (2010). Paradigm

In the social sciences, coding is an analytical process in which data, in both quantitative form (such as questionnaires results) or qualitative form (such as interview transcripts) are categorized to facilitate analysis.. One purpose of coding is to transform the data into a form suitable for computer-aided analysis. This categorization of information is an important step, for example, in ...
