Evidence of common descent of living organisms has been discovered by scientists researching in a variety of disciplines over many decades, demonstrating that all life on Earth comes from a single ancestor. This forms an important part of the evidence on which evolutionary theory rests, demonstrates that evolution does occur, and illustrates the processes that created Earth's biodiversity.

The BIOTECH Project has worked with over 100,000 students across Arizona in the past six years. Hundreds of teachers have brought engaging hands-on biotechnology activities to their classroom through professional development workshops, classroom visits and material and equipment loans.

### **BIOTECH Project Activities | BIOTECH**

We show, via a massive ( N = 689,003) experiment on Facebook, that emotional states can be transferred to others via emotional contagion, leading people to experience the same emotions without their awareness. We provide experimental evidence that emotional contagion occurs without direct interaction between people (exposure to a friend expressing an emotion is sufficient), and in the complete ...

The Perception Lab The Perception Lab is run by Dave Perrett. We are based in the University of St Andrews in Fife, Scotland. Our research is funded by the ESRC, BBSRC, S.I.N.A.P.S.E, and the EPSRC. In the lab, we investigate the many facets of face perception... what makes one person appear more trustworthy and cooperative than another?

### **The Perception Lab**

The E. coli long-term evolution experiment (LTEE) is an ongoing study in experimental evolution led by Richard Lenski that has been tracking genetic changes in 12 initially identical populations of asexual Escherichia coli bacteria since 24 February 1988. The populations reached the milestone of 50,000 generations in February 2010 and 66,000 in November 2016.
