A hypergeometric function is the sum of a hypergeometric series, which is defined as follows. Definition 1. A series  $\sum_{n=0}^{\infty} \frac{c_n}{n!} x^n$  is called hypergeometric if the ratio  $\frac{c_{n+1}}{c_n}$  is a rational function ... the radius of convergence  $R$  of the hypergeometric series is given by

The test based on the hypergeometric distribution (hypergeometric test) is identical to the corresponding one-tailed version of Fisher's exact test). Reciprocally, the p-value of a two-sided Fisher's exact test can be calculated as the sum of two appropriate hypergeometric tests (for more information see). Order of draws
