A maximum length sequence (MLS) is a type of pseudorandom binary sequence.. They are bit sequences generated using maximal linear feedback shift registers and are so called because they are periodic and reproduce every binary sequence (except the zero vector) that can be represented by the shift registers (i.e., for length- m registers they produce a sequence of length $2^m - 1$).

Primer guidelines, Howard Judelson, 10.06, p. 2 be inefficient: the primer with the higher T_m will misprime at lower temperatures, while the primer with the lower T_m may not work at higher temperatures. If the T_m difference is high, add or subtract bases from a primer.

Ideal is a British dark comedy-drama, [citation needed] originally broadcast on TV channel BBC Three, created by Graham Duff and produced by BBC Comedy North and Baby Cow Productions. It stars Johnny Vegas as small-time cannabis dealer Moz. . It is set in Salford, Greater Manchester, chosen because Duff was familiar with the area having done many stand-up gigs there during his youth.

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum
likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the
underlying biological structure was of hazard rates, and the transformation identified this.
