Social exchange theory is a social psychological and sociological perspective that explains social change and stability as a process of negotiated exchanges between parties. Social exchange theory posits that human relationships are formed by the use of a subjective cost-benefit analysis and the comparison of alternatives. The theory has roots in economics, psychology and sociology.

Social Learning Theory is a theory of learning and social behavior which proposes that new behaviors can be acquired by observing and imitating others. It states that learning is a cognitive process that takes place in a social context and can occur purely through observation or direct instruction, even in the absence of motor reproduction or direct reinforcement.

Hello! You have landed on this page because you were heading for one of the old websites made by me, David Gauntlett, in the distant past. Most of the stuff on sites like [theory.org.uk](http://theory.org.uk) and [newmediastudies.com](http://newmediastudies.com) was 12-20 years old, and I kept it all on the internet for a long long time in case anybody really needed it, but I think that time has now gone.
