Introduction. Maintaining or improving soil health is essential for sustainable and productive agriculture. "Healthy"™ soil will help to push sustainable agricultural productivity close to the limits set by soil type and climate. Key aspects of "healthy"™ soil include the following:

Enabling environments for climate-smart agriculture (CSA) are the framework conditions that facilitate and support the adoption of climate-smart technologies and practices. They include policies, institutional arrangements, stakeholder involvement and gender considerations, infrastructure, insurance schemes, as well as access to weather information and advisory services.

There were a number of significant heatwaves and warm spells across Australia during 2015, the most notable being an exceptional autumn heatwave across northern and central Australia during March, an early-season heatwave in October which affected nearly all of southern Australia, and extreme December heat across much of southeast Australia.. Only April and May saw national mean temperatures ...

Climate is the statistics of weather over long periods of time. It is measured by assessing the patterns of variation in temperature, humidity, atmospheric pressure, wind, precipitation, atmospheric particle count and other meteorological variables in a given region over long periods of time. Climate differs from weather, in that weather only describes the short-term conditions of these ...

Global warming is a long-term rise in the average temperature of the Earth's climate system, an aspect of climate change shown by temperature measurements and by multiple effects of the warming. The term commonly refers to the mainly human-caused observed warming since pre-industrial times and its projected continuation, though there were also much earlier periods of global warming.

Climate change risks are a consequence of the greatest example of market failure we have ever seen (Stern 2007). Market failure occurs when the market fails to take into account the costs (or benefits) of an action that accrue to firms or people who are not parties to the action.
