Introduction to Programming Using Java Version 6.0, June 2011 (Version 6.0.3, with minor corrections, January 2014) David J. Eck Hobart and William Smith Colleges

Introduction to Programming Using Java

Java is a general-purpose computer-programming language that is concurrent, class-based, object-oriented, and specifically designed to have as few implementation dependencies as possible. It is intended to let application developers "write once, run anywhere" (WORA), meaning that compiled Java code can run on all platforms that support Java without the need for recompilation.
