

introductory electrochemistry and related pdf

Electrode reaction rates and most double layer parameters are extensive quantities and have to be referred to the unit area of the interface. Knowledge of the real surface area of electrodes is therefore needed. Comparison of experimental data with theories or of experimental results for different materials and/or from different laboratories to each other is physically groundless without ...

Real surface area measurements in electrochemistry

Learn and research science, chemistry, biology, physics, math, astronomy, electronics, and much more. 101science.com is your scientific resource and internet science PORTAL to more than 20,000 science sites.

In organic chemistry, an alkene is an unsaturated hydrocarbon that contains at least one carbon-carbon double bond. The words alkene and olefin are often used interchangeably (see nomenclature section below). Acyclic alkenes, with only one double bond and no other functional groups, known as mono-enes, form a homologous series of hydrocarbons with the general formula $C_n H_{2n}$.

The analytical chemistry springboard Very nicely organized and annotated, by Knut Irgum. Analytical instruments and spectroscopic concepts - this site, nicely organized by Tom Chasteen of Sam Houston State U., contains tutorial materials on various topics in the form of Web pages, PDF files and Quicktime movies.. Analytical resources from Sheffield Hallam University (UK) has a number of ...

Chemistry tutorials

Chemistry Minor. A minor in Chemistry requires a minimum of 19 semester credit hours, six of which must be advanced (3000 or 4000 level). In addition to the courses listed below, an additional 3 credit hours must be taken from the following list: CHEM 3313, CHEM 3333/3331, CHEM 3411 with CHEM 3413, or CHEM 3632 with CHEM 3633.

Seeing old friends in a new light: A divergent synthesis of quinine and quinidine (see structures) was designed on the basis of a symmetrical and nonstereogenic intermediate, conceptually different from the stereodefined piperidine precursors used in past syntheses. Complementary late-stage local-desymmetrization reactions were developed to access the two targets.
