Group dynamics is a system of behaviors and psychological processes occurring within a social group (intragroup dynamics), or between social groups (intergroup dynamics). The study of group dynamics can be useful in understanding decision-making behaviour, tracking the spread of diseases in society, creating effective therapy techniques, and following the emergence and popularity of new ideas ...

In mathematics, a Lie group (pronounced /liː/ "Lee") is a group that is also a differentiable manifold, with the property that the group operations are smooth. Lie groups are named after Norwegian mathematician Sophus Lie, who laid the foundations of the theory of continuous transformation groups. In rough terms, a Lie group is a continuous group, that is, one whose elements are described ...

Then the track of the motion forms an n-braid in the three-dimensional space which is the product space of the plane and the time axis.
