Today I found out around 85% of humans only breathe out of one nostril at a time. Even more interesting is that the pattern of switching from breathing out of one nostril to the other happens in a cyclical fashion, with about four hours or so between each switch typically; although, this can vary from person to person and vary based on your body position or nasal congestion.

So I'm writing this post today as much for me as I am for you. As some of you know, I've been doing the low carb and gluten free thing for 2 years now, with great success. Over the Summer though, I got a little lax and the weight started creeping on. I got serious for a bit, then lax again, then serious, then lax, etc. Since then I've been gaining and losing the same 12 pounds for about 6 ...
