Natural gas consists mostly of methane, As we learned in Chapter 4, the complete combustion of a hydrocarbon, such as methane, yields carbon dioxide and water as products.

M07 PETR4521 10 SE C07 - Pearson

Solubility is the property of a solid, liquid or gaseous chemical substance called solute to dissolve in a solid, liquid or gaseous solvent. The solubility of a substance fundamentally depends on the physical and chemical properties of the solute and solvent as well as on temperature, pressure and presence of other chemicals (including changes to the pH) of the solution.

Solubility - Wikipedia

Etymology "Redox" is a portmanteau of the words "reduction" and "oxidation". The word oxidation originally implied reaction with oxygen to form an oxide, since dioxygen (O₂ (g)) was historically the first recognized oxidizing agent. Later, the term was expanded to encompass oxygen-like substances that accomplished parallel chemical reactions.
