Cerebrospinal fluid (CSF) is a clear, watery liquid that flows around the brain and spinal cord, surrounding and protecting them. A CSF analysis is a group of tests that evaluate substances in CSF in order to diagnose conditions affecting the brain and spinal cord (central nervous system).CSF is formed and secreted by the choroid plexus, a special tissue that has many blood vessels and that ...

Borax, also known as sodium borate, sodium tetraborate, or disodium tetraborate, is an important boron compound, a mineral, and a salt of boric acid. Powdered borax is white, consisting of soft colorless crystals that dissolve in water. A number of closely related minerals or chemical compounds that differ in their crystal water content are referred to as borax, but the word is usually used to ...

The Department of Chemical Engineering and Biotechnology at Cambridge University is one of the UK's leading research departments, ranking highly in both national and international University league tables. The department's research strategy responds to the global drive for sustainability, addressing the need for novel chemical engineering and biotechnology processes and materials.

Department of Chemical Engineering and Biotechnology

In a chemical reaction, chemical equilibrium is the state in which both reactants and products are present in concentrations which have no further tendency to change with time, so that there is no observable change in the properties of the system. Usually, this state results when the forward reaction proceeds at the same rate as the reverse reaction. ...

This paper reviews the current pathways for recycling of solid plastic waste, via both mechanical and chemical recycling. The predominant industrial technologies, design strategies and recycling examples of specific waste streams are reviewed.

Mechanical and chemical recycling of solid plastic waste

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
