Design and Specification Guide - SIG Design & Technology

A specification often refers to a set of documented requirements to be satisfied by a material, design, product, or service. A specification is often a type of technical standard.. There are different types of technical or engineering specifications (specs), and different usages of the term in different technical contexts.

Specification (technical standard) - Wikipedia

The Service-Oriented Architecture (SOA) reference architecture discussed in this article provides a blueprint for an enterprise or application architecture. It also establishes the building blocks of SOA: services, components, and flows that collectively support business processes and goals.

Design an SOA solution using a reference architecture

Design for Maintainability: The Importance of Operations and Maintenance Considerations During the Design Phase of Construction Projects. Resource Page " 08-01-2018. This resource page presents a methodology that links operations and maintenance goals to the design process, and how it can be applied to any organization.

44 thoughts on "What Actually Goes in a Functional Specification? Thrigun November 23, 2011 at 9:18 am. Hi Tony, My name is Thrigun, from Bangalore, India. Am working as business analyst in health care domain. I liked this blog written by you because even i have experienced similar thing when it comes to writing functional spec; the format, use cases, data fields, wireframe design etc.

What Actually Goes in a Functional Specification? - its

1 Introduction. Emoji are pictographs (pictorial symbols) that are typically presented in a colorful cartoon form and used inline in text. They represent things such as faces, weather, vehicles and buildings, food and drink, animals and plants, or icons that represent emotions, feelings, or activities.

UTS #51: Unicode Emoji

The BlueNRG-MS is a very low power Bluetooth low energy (BLE) single-mode network processor, compliant with Bluetooth specification v4.1.

Standards | OASIS

Design is the creation of a plan or convention for the construction of an object, system or measurable human interaction. Design has different connotations in different fields (see design disciplines below). In some cases, the direct construction of an object (as in pottery, engineering, management, coding, and graphic design) is also considered to use design thinking.
