ABSTRACT. The adaptation of psychological instruments is a complex process that requires a high methodological rigor. Because there is no consensus in the literature about its steps, this article discuss some essential aspects regarding the cross-cultural adaptation of psychological instruments and proposes guidelines to the researchers about the different steps of this process.

Many cultures consume blood as food, often in combination with meat. The blood may be in the form of blood sausage, as a thickener for sauces, a cured salted form for times of food scarcity, or in a blood soup. This is a product from domesticated animals, obtained at a place and time where the blood can run into a container and be swiftly consumed or processed.
