Dysarthria is a motor speech disorder resulting from neurological injury of the motor component of the motor-speech system and is characterized by poor articulation of phonemes. In other words, it is a condition in which problems effectively occur with the muscles that help produce speech, often making it very difficult to pronounce words.

Introduction This is not the final chapter to be written on the subject of speaking in tongues. Men (and women) will be having their say until our Lord returns to settle this matter once and for all time. It is difficult to say how, when and where the modern tongues movement began. In the many pamphlets and books I have examined opinions differ.
