Bangladesh is one of the world's most vulnerable countries for climate change. This observational study examined the association of temperature, humidity and rainfall with six common climate-sensitive infectious diseases in adults (malaria, diarrheal disease, enteric fever, encephalitis, pneumonia and bacterial meningitis) in northeastern Bangladesh.

Simply moisten the bird's head with water, place it next to a full glass of water and watch as the bird periodically dunks its head into the glass for a "drink". It continues for hours. Great centerpiece for class discussion or laboratory exploration. How does it work? Is it really perpetual motion...

84. Why no inverse-square law for magnetism? (Asked by a physics teacher) A student's question: if magnetism and electricity are unified in theory, then why does the electrical force between two charged particles follow the inverse square law but magnetic attraction or repulsion does not.

### **FAQ-6: "The Great Magnet, the Earth"**

2.1. Capacitive tactile sensors. A capacitive sensor consists of two conductive plates with a dielectric material sandwiched between them. For parallel plate capacitors, capacitance can be expressed as,  $C = \frac{\epsilon_0 \epsilon_r A}{d}$ . Where C is the capacitance, A is the overlapping area of the two plates,  $\epsilon_0$  is the permittivity of free space,  $\epsilon_r$  is the relative permittivity of the dielectric material ...
