In physics, a unified field theory (UFT) is a type of field theory that allows all that is usually thought of as fundamental forces and elementary particles to be written in terms of a pair of physical and virtual fields. According to the modern discoveries in physics, forces are not transmitted directly between interacting objects, but instead are described and interrupted by intermediary ...

I (Keith Cruitt) claim to have finished Albert Einstein's goal (of creating a "Unified Field Theory of Everything") by properly explaining the evidence placed in the "Observational Evidence Inventory of Science," which allowed me to discover the true nature of gravity (henceforth the "xgravity-fluid"), including how it actually interacts with the only two other constituent substances, i.e ...

In particle physics, supersymmetry (SUSY) is a principle that proposes a relationship between two basic classes of elementary particles: bosons, which have an integer-valued spin, and fermions, which have a half-integer spin. A type of spacetime symmetry, supersymmetry is a possible candidate for undiscovered particle physics, and seen as an elegant solution to many current problems in ...

MHCE8S Theory Indicates That the Energetic Neutrino Observed in Antarctica is a heavy (4430 MeV) Majorana Neutrino. Authors: George R. Briggs Comments: 3 Pages. Abstract: MHCE8S theory strongly indicates that a 4th massive neutrino exists, of 4430 MeV  $mc^2$  mass and Majoranic in Nature (the particle is its own antiparticle with no spin).
